Abstract

BabyUniporn was founded by a collection of specialists from various fields who decided to take on a new challenge. The project was launched in July 2021, and the community has grown rapidly since then.

Our purpose is to change the sex industry in this rapidly changing world. Nowadays, major industries, including pornography, have its own defined norms and standard. It is unarguably difficult to find a high-quality adult video with deviate content from mainstream channel, despite the increasing number of adult video platform. We want to eradicate the centralized characteristic of the industry in the same way that banking and finance are being decentralized by cryptocurrency.

Principles

Transparency and Trust

We strongly believe that for the token to thrive, bond and trust between founders and developers must be established. Even though the founders are not doxed, we want to be transparent and straightforward with the community as much as possible by answering questions, responding to concerns, and revealing every detail of the token.

Community

BabyUniporn will heavily rely on its community. Investors is everything to us and we will do our best to meet everyone's demand. Many community-related feature will be made available after launch, so please bear with us.

Resilience

This project is not a rush and careless project. Everyone involved has been dedicated days and months to ensure that BabyUniporn will become one of the major tokens in the world of cryptocurrency. Together, we will go beyond the moon and transform the sex industry.
